DETAILED ACTION

Election/Restrictions

In response to election/restrictions, the Applicant has elected Group I, claims 1-14,19-21, and 28-32 without traverse.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims **1-14,19-21,28-33** are provisionally rejected under the judicially created doctrine of double patenting over claims **1-64** of copending Application No. **2004/0163641A1**. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows:

- Claims 1,4, recite the limitation of claim 1 of '641A1 where an accumulator is considered broadly recited under "a storage chamber" of claim 8 of '641A1, and the a cumulative

Art Unit: 3743

function of the controlled recited in claims 2-5,9-14 of '641A1 are considered broadly racing the limitation of "a valve" and "a sensor" of claim 1.

- Claims 2,5-8 recite the limitation of claims 7,8,15, and 21 of '641A1.
- Claims 3,9, recite the limitation of claim 23 of '641A1
- Claims 10-11 are broadly recited under claim 8 of '641A1
- Claims 12-14,30-31 are broadly recited under the cumulative functions of the controlled recited in claims 2-5,9-14 of '641A1
- Claims 19-20,28 are recited under claim 64 and claim 21 is recited under claim 22 of '641A1
- Claims 32 and 33 are broadly recited under claim 1 of '641A1, where an accumulator is considered broadly recited under "a storage chamber" of claim 8 of '641A1, and limitations "a valve means", "a sensing means", "a controller means", and "a compliant regulating means" are considered a cumulative function of a controlled which are recited in claims 2-5,9-14 of '641A1,

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
